EDITOR'S NOTEBOOK

Dear Archie Readers,

Spring is just around the corner and you know what that means...baseball season! Archie, playing left field this season, finds himself in a real slump. He can't catch a fly ball, ground ball or even a cold. Archie needs some help, and fast. It just so happens that Dilton Doiley, boy genius, has invented a "homing glove." It works very similar to a magnet, whereby you don't have go for the ball, the ball will come to you. Archie seems like the perfect candidate to try it out. However, can Archie, in all good conscience, use this glove? If you want to improve your batting average, run straight home with a copy of **ARCHIE & FRIENDS #41**, on sale next month.

Let's stay on the subject of spring for one more paragraph. It's time for **ARCHIE'S SPRING BREAK**. This 48-Page Giant Special has become an annual event that everyone looks forward to. In the feature story for this issue, entitled "You Oughta Be In Pictures," Reggie invites the gang on a trip to Hollywood, where they will appear as "extras" in his cousin's epic action movie. Naturally, Reggie (and his ego) sees himself becoming a big movie star. However, the real star turns out to be.....well, I'll let you see for yourself. Bounce on over to wherever you buy your comics and "spring" for a copy of Archie's Spring Break #5.

Here's a TV UPDATE for all those readers who keep asking for current information on our TV shows. First there's **ARCHIE'S WEIRD MYSTERIES** which is on Monday through Friday on the PAX Network. You'll have to check your cable listings for the time and channel in your area. Next is the **SABRINA** animated show which is on the UPN Network every morning Monday through Friday and on ABC Saturday mornings. Last but not least is the live-action **SABRINA THE TEENAGE WITCH** show on ABC every Friday night, starring Melissa Joan Hart. Times and channels vary in different parts of the United States and Canada. Be sure to check your local TV listings.

Eagles

$10 FIRST PRIZE

By Vergel del Rosario

Pensacola, FL

The eagle is a large bird of prey in the hawk family, found in mountainous areas, near the sea, or in the forests. Most eagles are 2 to 3 feet long and their wings spread out up to 7 feet. Their feathers are brown, gray, or black, and the female is a little larger than the male. They have heavy, hooked bills and sharp claws called talons, which they use to catch and kill their prey. Eagles hunt in the daytime. Their sharp eyesight lets them spot a running rabbit 3 miles away. Some species eat small game birds or animals, while others eat fish or reptiles. Male and female eagles spend winter apart. They look for each other in late winter to begin their courtship displays including doing cartwheels in the sky. If they've nested together before, they use their old nest, adding to it, making it bigger and better. The female lays two to three eggs in early spring. Both parents take turns incubating the eggs, and bringing food to each other. In about 35-40 days the eaglets are hatched.

$5 SECOND PRIZE

Cheetahs

By Veronika Glesc

Coquitlam, BC CANADA

Cheetahs live in parts of Africa, the Middle East, Central Asia and India. The cheetah is similar to the leopard, but with a smaller head and longer body. The length of its head and body is about 4 ½ feet. Its claws are short and non-retractable, and its coat is yellowish-brown with black spots. The cheetah is the fastest animal on earth, being able to run at a speed of 70 miles per hour. Some people kill them for their fur. In India, the cheetah was trained and used for hunting.

The Story of Pink Milk.

It begins in Hershey and ends up in your glass. Just stir Hershey's® Strawberry Syrup into your milk, watch it turn pink, and drink up. Mmmmmmmmmmmmm.
